Illinois Legal Aid Online Launches New Drupal Website

"Illinois Legal Aid Online launched the redesigned site on Monday after almost a two-year process to streamline users' experience and upgrade the underlying architecture. The redesign replaced 25 separate legal categories with eight, plain-language groupings and made the site mobile-responsive, reflecting the uptick in consumers accessing the site through smartphones."

The new website is built with Drupal 7 and implements many best practices including use of plain language and responsive design.
